

Program overview for classrooms 2019 - 2020 school year

Our programs are designed to empower the next generation, while providing them life education skills. We are also Sustainable Development Goal Ambassadors, and focus on the following world goals

Learning objectives for our programs :

1. Critical thinking and problem solving
2. Soft skills : pitching/ presenting, budgeting, marketing
3. Importance of socially driven organizations

Climate Change Challenge : Free till Dec. 2019

Learn about the affects of climate change, and what we can do to take action! Through the use of holograms, 3D doodle pens and sphero's we will explore our earths climate, and create solutions.

If you come up with a really cool idea during our workshop, we will encourage you to enter into our Climate Change Challenge which is:

1. Present your idea to the City of Surrey, during a council meeting to Mayor and Council in the fall. You will get to take a tour of city hall as well!
3. Meet with members of Parliament and local Members of the legislative assembly to share why your ideas will make a difference
2. Pitch and present your idea to the public at the year end celebration to win prizes and resources in December!

Leadership/ Entrepreneurship : \$40 per student

Our world is filled with people who thrive in all things creativity. Within this workshop, students and educators will be guided along how to build an organization, how budgeting works, and how to create a sustainable, positive impact with simple ideas, that will have a lasting impact.

Leadership in technology/ science : \$50 per student

Through the use of : 3D doodle pens, holograms, and spheros, students will learn the importance of using technology for the good of the world. They will learn how to create innovating ideas using technology that can help solve community and worldly problems. This workshops will bring out the change maker in grades 3-12 students.
